

# EQUINE VACCINATION GUIDELINES for New Zealand

“We urge you to not only read this, but acknowledge your responsibility to your horse by putting thought into action and vaccinating your horse accordingly.” **The Committee of New Zealand Equine Health Association**

NEW ZEALAND  
EQUINE HEALTH  
ASSOCIATION INC

 Strongly recommended

 Consult your vet

Note: In the event that you are unsure of the horse's vaccination status, consult your vet about undertaking a Vaccination Priming Regimen. Vaccines available only under Veterinary Authorisation.  
\* Salmonella priming protocol two doses not less than 4 weeks apart. \*\*Rotavirus priming protocol is one dose at eight, nine and ten months of pregnancy.
